

PTCR WEB APP

Web-based documentation and evaluation of sintering, firing and heat treatment processes

DESCRIPTION

The **PTCR WEB APP** is a web-based application and offers our customers a special service. It enables new possibilities to simplify your work with the Process Temperature Control Rings **PTCR**.

Use for example the practical overview over your firing cycles and furnaces on your personalized home page. You are always informed in time about variations in your firing process. Acquire important details and information to your firing processes and furnaces. The correct temperature is automatically associated with your entered values, as the different temperature tables are already deposited. Evaluate your measuring results for individual periods of time with predefined parameters. Manage your firing processes - anytime, anywhere!

The APP is available on <https://ptcrwebapp.schupp-ceramics.com/>.

FUNCTIONS

- ✓ Acquisition, documentation & analysis of your measuring results
- ✓ Graphical preparation of your firing processes in history charts
- ✓ Comparison of several firing processes possible
- ✓ Print function and email dispatch of the data as PDF- or CSV-document
- ✓ Product information, data sheets and hand book

YOUR BENEFITS

- ✓ Decrease of possible error sources
- ✓ Temperature tables are stored; no paperwork
- ✓ Fast and simple analysis of your firing processes
- ✓ High data safety
- ✓ Easy handling

DATA SECURITY

Data protection and data security are very important to us. For this reason, the application is hosted in one of the most modern data centers of our IT provider.

- ✓ State of the art SSL encryption technology and daily data backup
- ✓ Connection via special security server to encrypt and protect your data
- ✓ Your data is treated as absolutely confidentially;
no disclosure to third parties
